Hello Eric,

The building has several backflow prevetors throughout the building. If you are referring to the preventor that the City requires at our main water supply we do not have one installed yet. However the building plumber has been onsite to obtain a material list in order to quote on the installation. We should be installing one shortly.

Regards,

Subject: backflow prevention

Property Manager,

Does [REDACTED] Street have a premise isolation backflow prevention device?

Eric Martin
